

# FirstLook™ for Schools

With thousands of new titles published every year, we understand how difficult it can be to monitor all of the best books for you and your students. To ease your workload, Baker & Taylor is pleased to announce our **FREE** service, **FirstLook for Schools!** FirstLook provides automatic notification of new titles appropriate for your students. **These selection lists are only available from Baker & Taylor!**

**FirstLook for Schools** leverages the power of *School Selection*™ by providing selection lists automatically each month. These selection lists will appear as carts in the cart listing area of your userID. Lists supplied as carts in *School Selection* can be sorted by Dewey classification, Author, or Title and be ordered easily. These selection lists significantly reduce time spent on identifying titles.

Because of the nature of audience levels used to support these services, titles may overlap lists, thus a title may appear in both the Middle School and High School lists. All available formats will be included when possible.
